Forty years ago Amartya Sen introduced to the world a novel approach to the idea of equality: the notion of 'basic capability' as 'a morally relevant dimension' and the claim that we should focus upon equality of basic capabilities.

These ideas have launched an academic armada now proceeding under the flag of the 'capability approach'. While that flag has ventured far and wide and engaged many areas of inquiry, this volume of essays is the first to explore how the capability approach might shed light upon labour law.

FEATURES

- Explores whether and how the capability approach can help us understand, justify, and reform labour law
- Offers new ways of seeing and debating familiar and concrete labour law issues
- Provokes new thinking about the purpose, content and scope of labour law
